EXPERIENCE

Radix, Tech Lead

2020 - Currently

Senior developer. Working in full stack development, experience in architecture definition and environment maintenance to reinforce the proposed architecture.

Freelancer, Developer

2018 - 2020

In this period as a freelancer, I have provided services to companies in the field of commercial automation, with great knowledge acquired in taxation due to the many hours of application in studies of tax rules, and in frameworks for generating electronic tax documents. During this period as a freelancer I have frequently used the following technologies: Delphi, C#, Xamarin, Flutter, Firebase, SQL Server, Firebird, GIT.

ITC, Senior Systems Analyst

2016 - 2017

Responsible for developing rules and routines in specific ERP (Senior Systems) language, developing technologies that integrate the corporate environment, work aligned with the company's management team, providing technology so that the company is only concerned with its industrial activity. Technologies used: C#, SQL Server, LSP (Senior Sistemas), Postgres, GIT, Jira.

Frescatto Company, Full Systems Analyst

2009 - 2013

Member of the company's development team, I had a great experience with PCP and financial systems, in addition to developing and maintaining rules in Senior Sistemas' ERP. Development of a fleet tracking system using Android. Visual Basic 6, C#, ASP.Net, SQL Server, Oracle, PHP, Android.
